We have expended over five-sixths of the money laid out the past year, on the roads leading to the out-skirts of the town. We have drilled over three hundred feet of rock, and blasted the same on the following roads: Providence Pike, the Boston & Hartford Pike, and the roads leading from the Centre, to the Oxford Pike, and the Nichols road, so called. We have removed over three thousand five hundred loads of gravel, in different sections of the town, including the Wallum Pond hill road, to the Rhode Island line.

The two past years under the present system, the town has expended on highways and bridges Two Thousand, Four Hundred and Twenty-Two Dollars per year, and the four years previous to the present system, the town expended Twenty-nine Hundred and Forty Five Dollars, on an average, making the sum of Five Hundred and Twenty-Three Dollars less per year under the new system than the old. The tax

payers of the town can judge for themselves which system has rendered the greatest benefit to the highways in the town, according to the different sums expended.

GENERAL REMARKS.

Your committee deem it proper to begin their report by recording the very sudden and lamented death of their very acceptable chairman, N. W. Preston, by whose death, so early in the year, deprived them of his very efficient services. It is difficult to speak of the personal merits of teachers, or of the standing of particular schools, without making invidious comparisons. We believe our teachers have been as faithful and successful as

in former years ; and that our schools the present year, compare favorably with those of the previous year ; though we do not doubt but that, under more favorable circumstances, there would have been greater success. There are greater or less hindrances to complete success in most, if not all our schools ; and generally from those who should feel the deepest interest in their success. There is not that full and hearty co-operation on the part of some parents which there should be, and which is absolutely necessary for the greatest proficiency. Teachers are often blamed and censured for what the parents are most responsible. Children who are not regular in their attendance cannot make the progress they would if prompt and timely. And no one can do so much to promote punctuality and regularity in attending school as parents. It depends chiefly upon them. One committee says : "Nothing is working a greater evil than tardy and irregular attendance of some scholars." Another says : "From ample opportunity of observation we are convinced that, in a large majority of cases, truancy is a sure indication of bad management at home."

It is to be much regretted that there are some parents who neglect to avail themselves of the privileges which our Commonwealth has so wisely and so generously provided for the education of their children. And it is to protect itself against the evils which result from neglect, that our State legislators have enacted compulsory laws, of which, perhaps, some are ignorant.

Sec. 1, Chap. 47 says : "Every person having under his control a child between the ages of 8 and 14 shall annually cause such child to attend for at least 20 weeks some public school in the city or town in which he resides." "And for any neglect of such duty the person offending shall forfeit to use of the public schools of such city or town a sum not to exceed twenty dollars." "It is the policy of the Commonwealth to offer to every child the advantages of a good education. It is supposed that every parent will voluntarily accept this offer." "But if in any cases, the offer is not accepted, the school authorities must take advantage of our compulsory law." "Every child must be in school for at least 20 weeks of the year, from the time he is eight until he reaches the age of 14."

"It is the imperative duty of the truant officer of a town, acting under instructions from the school committees, to secure the attendance of all children between the ages of 8 and 14 upon some approved school, for at least 20 weeks in any year." We have quoted the above that no parents can plead ignorance of the law. It is also important for the highest prosperity

of our schools that rooms in which they are kept be not only comfortable and healthy but pleasant and inviting.

The most of our school houses are in good repair and have been newly seated. The school houses in Dists. No. 2 and 4 need new seats and some repairs for the greater comfort of teachers and scholars. No. 10 has been re-seated the present year, and No. 1 painted inside and furnished with new recitation seats and teacher's desk, No. 7 repaired and painted outside and painted inside. Our predecessors recommended the consolidation of the three intermediate schools in East Douglas into two. Instead thereof, a Grammar school has been established with two intermediate schools, which we think will meet a much felt want, and be a benefit to the High school.

It is a question with some whether sufficient attention is given in our schools to moral instruction. We believe the statutes of our Commonwealth, wisely declare: "It shall be the duty of all instructors of youth to exert their best endeavors to impress upon the minds of children and youth committed to their care and instruction, the principles of piety and justice and a sacred regard to truth; love of their country, humanity, and universal benevolence; chastity, moderation and temperance; and those other virtues which are the ornament of human society and the basis upon which our republican constitution is founded."

And we would close with the language of another committee: "The influence of our schools, the influence of our homes, should be such as to inspire in the hearts of the young the love of all those virtues which adorn and embellish every walk in life, and establish in their deportment all those habits of diligence and punctuality, of undeviating truth and incorruptible honesty which are indispensable in every station in life."
